Frontend developer (ReactJS)

+998 (95) 010-33-00 | ishamsiddinov.97@gmail.com

**ABOUT ME:** As a front-end developer, I have developed nearly 10 projects with pure JS and React. My core stack is React, Next.js. I am also familiar with TypeScript. My favorite part of programming is the problem-solving aspect. Seeking a full-time software development position to deliver solutions for business needs.

## EXPERIENCE

- **Hoca Inc. (South Korea). 2023 Aug – 2023 November** as *frontend developer intern*  
During internship program, I have participated in two projects, one was platform for job seekers and another one was map application for finding the best route. Learned working with a team by using git technologies like git branching model, conventional commits, kanban board.
