ABOUT ME: Passionate Frontend Software Engineer specializing in React and Next.js. I thrive on creating high-quality, user-centric web experiences with clean, efficient code and intuitive UI design. My focus on mastering a single technology stack enables me to deliver exceptional, innovative solutions that exceed expectations. Let's connect and explore how we can build something amazing together!

EXPERIENCE

- **Hoca Inc. 2023 Aug – 2023 November** as *frontend developer intern*

During my internship program, I contributed to two key projects: one focused on developing a platform for job seekers, and the other on creating a map application for optimizing route finding.

- **Dynamic Soft. 2024 Feb – present** as *frontend developer*

At my workplace, my responsibilities include developing web applications, with a focus on commercial websites, e-commerce platforms, ERP, and CRM systems. I collaborate closely with UI/UX designers to ensure a seamless user experience, and work alongside backend developers to integrate complex functionality. Additionally, I contribute by proposing new technologies and solutions aimed at improving development efficiency and enhancing overall project outcomes.
